This workshop aimed to bring faculty members together and had 3 hours interactive and two-way communication session among participants and as well with facilitator that provided span of

knowledge by participating different activities and tasks. The title itself “Educational Planning” demonstrated many areas that needed to be enlightened by this workshop.

Main objectives of this workshop are under:

- ✓ Develop an educational plan based on educational principles.
- ✓ Write educational objectives for one’s own program.
- ✓ Select suitable teaching and assessment methods according to the objectives.

Feedback

By the end of this session participants learned how to make objectives for the course, and able to differentiate between outcomes and objective. Furthermore, they appreciated the great knowledge and tasks related to table of specification and its importance. They found overall environment very friendly and corporative. This workshop helped faculty members to plan curriculum throughout the semester. In addition, they mentioned that facilitator was well prepared and well organized. Overall, they satisfied with the content presented in workshop as well as with instructor.
